SUGGS

Sir:

Responsive to the office action mailed on June 18, 1999, please amend the application identified above as follows, in accordance with 37 CFR 1.116.

The examiner is urged to enter and favorably reconsider this amendment because:

- a) The claims are presented in better form for consideration on appeal, as the claims are narrowed (37 CFR 1.116(a) and MPEP 714.13).
- b) This amendment was not earlier presented because it is submitted as a consequence of the examiner's position as is particularly set forth in the final office action (37 CFR 1.116(b)).
